## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

With respect to claims 1<sup>15</sup> and 16-17, it is not clear as how “the output indicator is being utilized in the driver circuit to control the modulation current”.

Further, claims 1, 5, and 16-17 are indefinite and vague since it has been held that the recitation that an element is “adapted to” perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchinson, 69 USPQ 138.

The remaining claims are dependent on the above rejected claims and therefore are also rejected.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-2, 5, and 9-17 are rejected under 35 U.S.C. 102(a) as being anticipated by Koga et al. (USPN 6266078) (herein after Koga).

With respect to claims 1, 5, and 9-17, Koga show in Fig.5 a driver circuit for an optical source comprising an input stage coupled to an output stage, a modulation current generator circuit (121A and 121B), an output load detection circuit (145 and 146) generating an output indicator, and an output logic gate 147.

With respect to claim 2, Koga show in Fig.5 a laser diode 113, 112, and 111.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koga et al. (USPN 6266078) in view of Link (USPN 5883910). Koga disclose all limitations of the claims except for the input stage and the output stage comprising a differential pair and the intermediate stage. Link teaches in Fig.3 an output stage comprising a differential pair (Q1 and Q2), an input stage comprising a differential pair (Q5 and Q6), and an intermediate stage comprising Q3, Q4, Q7, and Q8. For the benefit of a driver circuit, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Koga a differential pair for an output stage and an input stage and a push-pull stage for an intermediate stage as taught by Link.

### **Citation of The Pertinent References**

The following US patents are being made of record, even though they were not relied upon in this Office action, for being similar in subject matter, and may be relied upon in any future Office Actions: 6362910, 6044095, 5970026, 6466061, 6151344, and 4606637.

### **Communication Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (703) 305-7159. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 306-5511 for regular communications and (703) 306-5511 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-3329.
